ODC Migration Ready

What is an ODC Assessment?

With the CoolProfs ODC Assessment, you gain **critical insights** into your OutSystems landscape. This is considered a requirement for a successful ODC migration strategy.

Our expert assessment offers comprehensive insights into your application landscape. We **visualize your architecture** and gather critical metrics. These help you create a robust roadmap and migration strategy towards OutSystems ODC.

Our Approach

- ✓ Expert-Led Assessment: Over 4 days, our team will collaborate with your own experts to gather and analyze all necessary information from your OutSystems platform.
- ✓ Efficient Process: From the 4 days, our streamlined process requires only 1 day of your time, ensuring minimal disruption to your operations.

Special Offer

For this comprehensive assessment, we utilize two of our cutting-edge products: **Cool Model** and **Cool Scope**. Post-assessment, Cool Scope remains yours, providing ongoing application metrics and updates, ensuring a thorough and up-to-date analysis. Cool Model will be available during the assessment to generate all necessary architecture visualizations, which will be included in our review. As your architecture evolves during development, we recommend continuing with Cool Model to maintain current architectural insights, ensuring you stay on the designated path.

Cool Model

One of the key tools used in this assessment is CoolProfs' Cool Model, designed to provide up-to-date insights into the software architecture of OutSystems applications. This tool helps speed up analysis and improves planning and onboarding processes.

Cool Scope

Cool Scope brings all your OutSystems applications into one clear, comprehensive view. Get a complete snapshot of all your OutSystems applications in a single, easy-to-navigate interface. Quickly identify which applications are prime candidates for refactoring or phasing out, streamlining your development process. Gain valuable insights into the Application Objects (AOs) associated with each application, helping you understand and manage costs effectively.

Assessment Breakdown

Preparation: Our team will install assessment components on your Development environment. This may require the help of your OutSystems platform administrator.

Day 1: We will conduct an initial review of raw data with your architect, tech lead, or subject matter expert to identify all applications and set up domains/functional application levels.

Day 2 & 3: Our experts will analyze the visual architecture and functional applications, identifying migration challenges and best practices.

Day 4: We will present and discuss our findings, providing clear next steps for your migration journey.

Next Steps

Based on our findings and your specific needs, we can offer further assistance with in-depth analysis, roadmap development, and training for your OutSystems team to ensure a successful migration to ODC.

Application Name	Application Objects	Screens	Webblocks	Traditional Screens	Traditional Webblocks	Client Actions	Service Actions	API Methods	Entities	Static Entities	Light BPT

Exceptional Value

This fixed-price, fixed-time assessment is available for just € 5.000 (ex. VAT). To further enhance the value, we are pleased to offer the first year of Cool Model at a discount. This exclusive offer ensures you have continuous, detailed architectural insights at an unbeatable price.

By choosing our assessment, you are not only investing in an expert-led, efficient evaluation but also securing top-notch tools at an exceptional value—paving the way for a seamless and successful migration to OutSystems ODC.

Data Privacy

We take data privacy very seriously. All metadata gathered during the assessment will be used solely for the purpose of this assessment. If you decide not to continue with Cool Model, all collected data will be permanently erased from our systems. We ensure that your data is handled with the utmost care and confidentiality throughout the entire process.

CoolProf is a leading OutSystems consultancy firm, focused on the development of complex information systems. Our approach is fully focused on the business and covers the entire lifecycle. We are a highly qualified OutSystems partner. CoolProf works for innovative organizations such as a.s.r., PGGM, Samskip and WoningNet and we do so with pride and pleasure. Our Center of Excellence proposition ensures a holistic and successful rollout of low-code solutions.
